Come celebrate the planet with us at **Alameda's Earth Day Festival!** As part of the celebration, it is our goal to present simple lifestyle changes to help the environment. Upcycling is one of those simple changes.

Upcycling is a process of taking existing, old products, and making them into new products. It's a different way of thinking about the materials we consume and what else can be done with them at the end of their useful life. For example, turn your one-time use plastic bottle into a colorful winder spinner instead of tossing it into a recycling bin. You've taken a useless product and made it into an admirable art piece--a product of better quality. Now you're upcycling!

Enjoy **FREE** activities for the kids, **Earth Day** games and exhibits and learn about building a clean, healthy, sustainable world for generations to come.
